

## Bingo Instructions and Rules

- Can't mark off a square until hack has been presented.
- Only one square per hack, even if it qualifies for multiple squares.
- Win by crossing off 5 in a row (diagonals accepted).
- Declare bingo by tweeting or messaging in IRC #mhdbingo.
- Keep playing until the prizes run out.

|  |                                     |   |  |                                |
|--|-------------------------------------|---|--|--------------------------------|
| "It's like [X] for [Y]"                        | Uses GPS                            | Unnecessary number of APIs (5+)                 | Friday or Saturday by Rebecca Black        | Everyone calls a Twilio number |
| Bitcoin  | Adds feature to own product         | Piecharts                                       | Too many cooks (5+ hackers on one project) | Augmented reality              |
| SMS collaborative playlist                     | Comic Sans                          | International Executive Hack                    | Hack based on name alone                   | Questionable theremin          |
| Kinect demo fail                               | Audio clipping through sound system | Demo includes live performance of an instrument | Using laser-pointer with slides            | XML                            |
| Smugness about functional programming language | Non-hardware, non-browser           | Only hack to use a sponsor's API                | Karaoke                                    | Product pitch                  |

Thanks to @alsothings, @karltryggvason and @sara\_sgm for their financial support towards prizes!  
And a big thank you to Proactive for printing!

|   |                                     |                                   |                                 |   |
|---|-------------------------------------|-----------------------------------|---------------------------------|---|
| Using laser-pointer with slides         | Boasting about Node.js              | Unnecessary Twitter integration   | What Does the Fox Say           | Clearly too much caffeine                       |
| Used at least two programming languages | You should follow me on Twitter     | Rick rolling                      | Piecharts                       | Comic Sans                                      |
| Kinect demo fail                        | Gamification                        | International Executive Hack      | Bootstrap default theme website | Demo includes live performance of an instrument |
| Unnecessary number of APIs (5+)         | Presenter mentions Fourier analysis | Demo due to error in code         | Dev mentions they're hireable   | Private info accidentally shown                 |
| Miley Cyrus reference                   | Bangarang                           | Unfortunately no one used our API | SMS collaborative playlist      | Gigs on a map                                   |

Thanks to @alsothings, @karltryggvason and @sara\_sgm for their financial support towards prizes!  
And a big thank you to Proactive for printing!

See <https://www.hackerleague.org/hackathons/music-hack-day-london-2013/hacks/mhd-bingo> for more info about this hack.

## Bingo Instructions and Rules

- Can't mark off a square until hack has been presented.
- Only one square per hack, even if it qualifies for multiple squares.
- Win by crossing off 5 in a row (diagonals accepted).
- Declare bingo by tweeting or messaging in IRC #mhdbingo.
- Keep playing until the prizes run out.

|                                 |   |                               |  |  |
|---------------------------------|---|-------------------------------|--|--|
| xkcd reference                  | Product pitch                           | Demo due to error in code     | Augmented reality                          | Unnecessary Arduino                        |
| Unnecessary Twitter integration | XML                                     | Rick rolling                  | Matlab plot                                | Grid of blinking lights                    |
| Sentiment/mood analysis         | Use of CouchDB/MongoDB                  | International Executive Hack  | Party playlister                           | Old inside joke; only funny to old hackers |
| Non-hardware, non-browser       | Artists on a map                        | Bangarang                     | Too many cooks (5+ hackers on one project) | Christmas theme                            |
| Blame hack fail on API          | Unnecessary Single Page Web Application | Blame projector fail on Linux | Clearly not done in weekend                | Tracks on a map                            |
